

Industry Placements

Immersive internship programs* and in-company projects

Real workplace, real experience, real projects

Accelerate your Work Integrated Learning program with a Readygrad partnership and gain access to hundreds of industry partners. Readygrad works with universities and education partners, developing responsive, scalable and quality assured, end-to-end industry based WIL solutions.

Internships & Industry Placements

Offering full immersion into the workplace, industry placements are commonly considered the optimum Work Integrated Learning experience for students.

Recognising that industry placements can be high touch and resource heavy programs Readygrad has developed unique solutions for educational partners, taking the stress out of developing and managing an industry based Internship program, and also providing immediate access to hundreds of industry partners. Our programs are tailored to suit the academic requirements of existing programs and can provide additional staffing to our educational partners.

Readygrad's Work Integrated Learning placement is delivered by Readygrad Pty Ltd (RTO 45724), therefore the program can be delivered in conjunction with tertiary programs for course credit, or as a standalone extracurricular program.

Internship Placement Program Features*

- / Student one-on-one consultation with a dedicated placement consultant
- / Presentation and soft skill preparation
- / Relevant industry placement
- / Midpoint and exit evaluations with students and host companies
- / Optional: BSBOPS201 – Work effectively in business environments Statement of Attainment on successful completion of the program, delivered by Readygrad Pty Ltd (RTO 45724)

Institution Benefits

- / Comprehensive plug-in, industry placement solution tailored to partners' academic and student needs
- / Instant scalability of internship program resources
- / Nationally recognised training program meeting Fair Work Australia's definition of Vocational Placements
- / Worker's Compensation Insurance included
- / Access to our extensive network of host companies

In-Company Projects

Highly scalable and high on impact, Readygrad in-company projects offer an affordable and flexible solution for education partners looking to add a short term industry based learning experience for students.

This intensive program is designed to rapidly equip students with the essential employability skills demanded by employers today through professional development, exposure to industry, and the application of technical skills and practical knowledge outside the university environment. Students also have the opportunity to establish industry contacts and build a professional network.

In-Company Projects Snapshot

- / Collaborative projects between students and businesses
- / Students work on an authentic real business project directly related to their field of study
- / E-learning and face-to-face workshops including critical employability skills, workplace preparation and project management
- / Industry placement with an in-company mentor

Institution Benefits

- / Highly scalable, low resource, plug-in solution
- / Immersive industry based WIL program working on authentic projects in real businesses
- / Intensive two week placements minimise impact on semesters and semester breaks
- / Tailored solutions suited to students' experience and university studies
- / Developed from an employer perspective
- / Access to Readygrad's extensive network of host companies
